- Saves on logistics costs.
- Very low maintenance.

Up to **70% less expensive** than a classic solution.

Reliable solution

- Over 50 years of expertise.
- Food grade compliant.
- Strength technical fabric.
- Certified ISO 9001.

Some pillow tanks are installed since **15 years** worldwide.

Practical solution

- Light and foldable.
- Rapidly deployable.
- UV Treatment in the mass.
- High capacity of volume.

Set up a 500m³ pillow tank in less than **4 hours**.

> TECHNICAL CHARACTERISTICS

- High resistance textile (minimum 1100gr/m2).
- 100% polyester.
- Temperature scale: -30°C à +70°C.
- Tear strength: 700 N (minimum).
- PVC treated fabric: 400 daN/5cm (minimum).
- UV treatment in the mass.
- Food standard.
- KTW homologation.
- European tissue.
- Various colour.

> WARRANTIES

Our flexible tanks are **guaranteed for 10 years** against all manufacturing faults. This warranty is only valid if recommendations for installation and operation, as well as usage conditions have been strictly observed. Any modifications made to our products without prior agreement will invalidate the warranty.

> CERTIFICATIONS & DOCUMENTS

For many years now, we have implemented a quality policy that is officially recognised by ISO 9001 Version 2008 certification issued by the organisation SGS-TUV SAAR. Every product is marked to allow materials and manufacturing traceability. Tests carried out by our Quality Control Department validate the products' compliance and reliability prior to shipping.

Our flexible tanks can be delivered with:

- Declaration of compliance confirming the conduct of the tests.
- Instructions for use.
- Recommendations for operation.
- Maintenance recommendations.
